

Australian Geophysical Observing System

Monitoring and understanding the physical state of the accessible crust

AGOS components

- Geospatial Observatory - *surface responses to sub-surface activity* Geoscience Australia
- Earth Sounding Network - *imaging the crust* ANU, University of Adelaide
- Subsurface Observatory - *accessing the subsurface* University of Melbourne
- Geohistory Laboratory - *constraining time dependence* Curtin and Melbourne Universities
- Inversion Laboratory - *adding value to the data* ANU and University of Queensland
- Geophysical Education Observatory - *explaining the purpose* Macquarie University and ANU
